EDUCATION

Union College

B.S. in Computer Science and B.A. in Economics; GPA: 3.6; Cum Laude

Schenectady, NY

Expected June 2026

- Work Study: Student Manager, Division I Men's Ice Hockey
- Departmental Honors in Economics and Computer Science

EXPERIENCE

Software Engineer I

LexisNexis Risk Solutions

June 2026 - Present

Alpharetta, GA

- Collaborating with senior engineers to research and implement CI/CD pipeline automation, modernizing and streamlining the software release process.
- Collaborating with engineers and business stakeholders to develop a LangGraph-based AI agent that summarizes and explains functionality within legacy company codebases.
- Partnering with stakeholders to develop Grafana dashboards that improve visibility into product performance and operational metrics.

Software Engineer Intern

LexisNexis Risk Solutions

May 2025 – July 2025

Alpharetta, GA

- Optimized Azure Blob Storage usage through performance analysis and testing.
- Improved code quality by increasing JUnit test coverage to near 100% across the assigned repositories.
- Developed full-stack functionality to enable automated export of results to Excel.

Line Service Technician, Seasonal

Nantucket Memorial Airport

June 2023 – August 2025

Nantucket, MA

- Expedited fuel orders for quick-turnaround aircraft on the General Aviation (GA) ramp.
- Performed aircraft services including fueling, GPU connections and disconnections, and lavatory service.
- Directed passenger movement on the GA ramp in compliance with FAA and TSA safety regulations.
- Communicated with tower and airport staff to ensure the safe movement of vehicles.

ACADEMIC AND PERSONAL PROJECTS

NHL Contract Value Prediction | Full-Stack Development and Deployment

FastAPI, React, PostgreSQL, scikit-learn

- Built and deployed a full-stack application for NHL contract value prediction.
- Designed APIs, a database schema, and machine-learning pipelines for training and serving predictions.
- Ingested public hockey datasets into PostgreSQL for analytics and inference.
- Containerized the application with Docker for reproducible development and deployment.

Airport Operations Organizer | Full-Stack Development

SQL, Maven, React

- Designed a full-stack application to manage airport operations.
- Recommended and assigned tasks and service requests to line service technicians.
- Assigned aircraft parking positions based on departure times, future arrivals, and operational constraints.
- Built systems to manage fuel farms and fuel trucks.

Flight Disruption Prediction | Machine Learning and Data Analysis

Python, pandas, scikit-learn

- Engineered features including scheduled hour and airline to improve classification performance.
- Built models to predict flight disruptions and evaluated them using F1-score and RMSE.

Airline Pricing & Competition | Senior Honors Economics Thesis

Fall 2025 – Winter 2026

- Modeled route-level airline competition using supply, demand, and macroeconomic controls.
- Processed and merged large-scale DOT datasets into a route-level panel spanning time, carriers, and markets.
- Implemented a difference-in-differences framework with fixed effects to isolate the impact of low-cost carrier exit on airfare.
- Found an approximately 7.15% fare increase following low-cost carrier exit, highlighting the role of competitive pressure.

NHL Contract-Year Performance | Research Project

Python, pandas, Econometrics

- Consolidated more than 70 datasets into a clean, unified structure for analysis.
- Led a three-person research team, producing a 30-page empirical paper and a 50-minute academic presentation.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript

Frameworks & Tools: FastAPI, React, Spring Boot, PostgreSQL, SQLAlchemy, Docker, Git, Maven

Data & Analytics: pandas, NumPy, scikit-learn, Excel, Tableau, Econometrics Methods
