

Evan Cillie

Atlanta, GA | cillieevan@gmail.com | 203-707-3968 | linkedin.com/in/evan-cillie

EDUCATION

Union College

B.S. in Computer Science and B.A. in Economics; GPA: 3.6; Cum Laude

Schenectady, NY

Expected June 2026

- Work Study: Student Manager, Division I Men's Ice Hockey
- Departmental Honors in Economics and Computer Science

EXPERIENCE

Software Engineer I

LexisNexis Risk Solutions

June 2026 - Present

Alpharetta, GA

- Collaborating with senior engineers to research and implement CI/CD pipeline automation, modernizing and streamlining the software release process.
- Collaborating with engineers and business stakeholders to develop a LangGraph-based AI agent that summarizes and explains functionality within legacy company codebases.
- Partnering with stakeholders to develop Grafana dashboards that improve visibility into product performance and operational metrics.

Software Engineer Intern

LexisNexis Risk Solutions

May 2025 – July 2025

Alpharetta, GA

- Optimized Azure Blob Storage usage through performance analysis and testing.
- Increased JUnit test coverage by 30% across multiple Java-based packages.
- Developed full-stack functionality to enable automated export of results to Excel.

Line Service Technician, Seasonal

Nantucket Memorial Airport

June 2023 – August 2025

Nantucket, MA

- Expedited fuel orders for quick-turnaround aircraft on the General Aviation (GA) ramp.
- Performed aircraft services including fueling, GPU connections and disconnections, and lavatory service.
- Directed passenger movement on the GA ramp in compliance with FAA and TSA safety regulations.
- Communicated with tower and airport staff to ensure the safe movement of vehicles.

ACADEMIC AND PERSONAL PROJECTS

Airline Pricing & Competition | *Senior Honors Economics Thesis*

Fall 2025 – Winter 2026

- Modeled route-level airline competition using supply, demand, and macroeconomic controls.
- Processed and merged large-scale DOT datasets into a route-level panel spanning time, carriers, and markets.
- Implemented a difference-in-differences framework with fixed effects to isolate the impact of low-cost carrier exit on airfare.
- Found an approximately 7.15% fare increase following low-cost carrier exit, highlighting the role of competitive pressure.

Airport Operations Organizer | *Full-Stack Development*

Fall 2024 – Present

- Designed a full-stack application using SQL, Maven, and React to manage airport operations.
- Recommended and assigned tasks and service requests to line service technicians.
- Assigned aircraft parking positions based on departure times, future arrivals, and operational constraints.

U.S. Airline Industry Analysis | *Industry Report*

Winter 2026

- Analyzed U.S. aviation market structure using HHI and CR4 at the national, airport, and route levels.
- Evaluated major airline mergers using antitrust and competition frameworks.
- Identified hub dominance and route-level competition as primary drivers of pricing power.

Flight Disruption Prediction | *Machine Learning and Data Analysis*

Spring 2025

- Built supervised machine-learning models to predict flight delays and cancellations.
- Addressed class imbalance using precision, recall, and F1-score rather than accuracy.
- Compared model performance; tree-based models improved recall but reduced precision.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript

Frameworks & Tools: React, Spring Boot, Maven, Git, Tableau

Data & Analytics: pandas, NumPy, scikit-learn, Econometrics, Excel
